SKILLS

- Terraform
- Git
- AWS
- Jenkins
- Docker
- GitLab
- Kubernetes

EDUCATION

2021 - 2024

NANDHA ENGINEERING COLLEGE

- Bachelor of Engineering (Mechanical Engineering)
- CGPA 8.1/10

2016 - 2019

KONGU POLYTECHNIC COLLEGE

- Diploma (Automobile)

OBJECTIVE

Seeking an entry-level role to apply my expertise in cloud computing, CI/CD pipelines, and automation technologies, I am a highly motivated AWS and DevOps lover. enthusiastic in acquiring and applying best practices in DevOps, cloud deployment, and infrastructure as code (IaC) approaches.

WORK EXPERIENCE

Cpos - Chennai   February-2025 - June-2025

Junior DevOps Engineer

- Provided L1 support for CI/CD pipelines using Jenkins and GitLab CI for 5+ microservices, ensuring smooth deployment workflows and prompt issue resolution.
- Contributed to a 15% reduction in deployment delays, enabling Week release cycles.
- Monitored and troubleshot containerized applications on Docker and Kubernetes post-migration, leveraging AWS CloudWatch to ensure optimal resource utilization and performance
- Deployed and maintained services on AWS cloud infrastructure, managing environments across both Linux (Amazon Linux) and Ubuntu servers.

Ratoon Infotech Private Limited   June 2024 – January 2025

DevOps Engineering Intern

- Completed hands-on training in core AWS services: EC2, S3, IAM, RDS, Lambda, and CloudFormation.
- Practiced DevOps methodologies including Continuous Integration/Continuous Deployment (CI/CD).
- Utilized tools such as Git, Jenkins, Docker, Kubernetes, and Terraform to support development workflows.
- Contributed to real-time projects and automated development, testing, and deployment pipelines.
- Demonstrated strong problem-solving skills, adaptability, and a commitment to learning in a fast-paced environment.
